

Item 5
Accessible Electric Vehicle Project

access

Access Accessible Fleet Electrification Pilot

Access Services is planning to conduct a pilot on fleet electrification in three different regions. The vehicle to be deployed is the electric ProMaster. The project calls for the acquisition of 10 electric ProMasters and Level 2 fast charging establishment in three locations. The total budget is \$3.89 Million. Access is seeking potential federal funds to kick start the project.

The potential federal funding sources are:

- **Transportation Reauthorization Bill**
- House Appropriations Bill
- FTA LOW/No Emission Vehicle Project

access

AEV - ProMaster
