

ACCESS SERVICES
LOS ANGELES COUNTY

TITLE VI REPORT

OCTOBER 2025 - SEPTEMBER 2028

I. Introduction

This document was prepared pursuant to FTA Circular 4702.1B Title VI Requirements and Guidelines for Federal Transit Administration Recipients and reflects the policies of Access Services.

Access Services is a state mandated local public agency created by Los Angeles County's public transit agencies to administer and manage the delivery of complementary Americans with Disabilities Act (ADA) paratransit service and to coordinate human service transportation agencies as the Consolidated Transportation Services Agency (CTSA). Currently there are forty-six (46) public transit operators serving Los Angeles County that are the member agencies and formal stakeholders of Access Services. The members are listed under **Appendix A**. Access Services is a public agency within the meanings of the California Fair Political Practices Act and the California Open Meetings and Records Act (Brown Act).

Access Services is governed by a nine-member Board of Directors with directors appointed by the following organizations:

- The County of Los Angeles Board of Supervisors
- City Selection Committee's Corridor Transportation Representatives
- Office of the Mayor of the City of Los Angeles
- Governing boards of the municipal fixed-route operators
- Governing boards of the local fixed-route operators
- Los Angeles County Commission on Disabilities
- Los Angeles County Independent Living Centers
- Los Angeles Metro staff
- Local fixed-route operators and municipal fixed-route operators (rotating appointment)

The Board has created two advisory committees, the Community Advisory Committee (CAC) and Transportation Professionals Advisory Committee (TPAC). Both CAC and TPAC have 15 voting members. The Chairperson positions of CAC and TPAC serve as ex-officio members of the Board of Directors.

Access Services executive management team is comprised of an Executive Director, Deputy Executive Director, Chief Operations Officer, and the

directors or managers of the following departments: Administration, Customer Relations, Eligibility, Finance, Fleet Design, Information Technology, Government Affairs and Outreach, Operations, Planning, Procurement and Contract Administration, and Training and Development. Access currently employs eighty-two (82) individuals.¹ An organization chart presenting the variety of positions and departments operated by Access Services is included in **Appendix B**. Paratransit dispatch and transportation operations are operated by six contractors (service providers) and eligibility determination services are provided by one contractor. Access Services staff manage the paratransit and eligibility contracts.

II. **General Title VI Requirements and Guidelines for Providers of Paratransit Services**

The Title VI requirements that Access Services must follow are contained in Chapter III (General Requirements and Guidelines) of FTA Circular 4702.1B.

Access Services' Title VI requirements are not spelled out in Chapter IV - Requirements and Guidelines for Fixed Route Transit Providers as Access service is exclusively paratransit (demand-response) service with no Fixed Route service. As stated in Chapter IV of the Circular "Providers of public transportation that only operated demand response service are responsible only for the requirements in Chapter III. Demand response includes general public paratransit, Americans with Disabilities Act complementary paratransit, vanpools and Section 5310 non-profits that serve only their own clientele (closed door service)."

Access is responsible to produce certain documents/reports to demonstrate their compliance with Title VI. As contained in Chapter III, section 2 "In accordance with 49 CFR Section 21.7(a), every application for financial assistance from FTA must be accompanied by an assurance that the applicant will carry out the program in compliance with DOT's Title VI regulations." Further, contained in Chapter III, section 4, "FTA requires that all direct and primary recipients document their compliance with DOT's Title VI regulations by submitting a Title VI Program to their FTA regional Civil rights officer once every three years or as otherwise directed by FTA."

¹ Employment data gathered in July 2025.

Following the guidance of Chapter III of FTA Circular 4702.1B, there are a series of requirements that Access must meet:

- 1) Title VI Program must be approved by Access' Board of Directors;
- 2) Requirement to Notify Public of Protection Under Title VI;
- 3) Requirement to Develop Title VI Complaint Procedures and Complaint Form;
- 4) Requirement to Record and Report Transit-Related Title VI Investigations, Complaints and Lawsuits;
- 5) Requirement to Promote Public Participation (Develop a Public Participation Plan);
- 6) Requirement to Provide Meaningful Access to Limited English Proficiency (LEP) Persons;
- 7) Requirement to Have Minority Representation on Access' Board of Directors and Advisory Boards(Committees); and
- 8) Requirement to Monitor Subrecipients (Contractors) Title VI Compliance;

A. Title VI Approval by Access' Board of Directors

As contained in FTA Circular 4702.1B, Chapter III, section 4, FTA requires that "the Title VI Program must be approved by the recipient's (Access') Board of Directors . . ."

Access must "submit a copy of the board resolution, meeting minutes or similar documentation with the Title VI Program as evidence that the board of directors . . . has approved the Title VI Program."

Access' Title VI Program and associated Title VI reports will be brought before Access Services' Board of Directors on Monday, September 22nd. Contained in **Appendix C** of this report is a copy of the Board of Directors Committee agenda for September 22nd. **Appendix D** of this report is a copy of a memorandum signed by the Chair of Access' Board of Directors attesting to the fact that the Board did, in fact, review and adopt the Title VI Plan at its September 22nd meeting. This Plan will not include the minutes of the September 22nd meeting due to the fact that the meeting minutes will not be available until the Board's October 2025 meeting after the expiration of Access' 2022-2025 Title VI Plan.

B. Requirement to Notify Customers of Protection under Title VI

As per guidance in FTA Circular 4702.1B, Chapter III, Section 4, recipients are required "to provide information to the public regarding the recipient's obligations under DOT's Title VI regulations and apprise members of the public of the protections against discrimination afforded to them by Title VI. At a minimum, recipients shall disseminate this information on the agency's website and in public areas of the agency's office(s), including the reception desk, meeting rooms, etc."

1. Access Services Website

Access provides information about its commitment to Title VI non-discrimination rules on its website at the following location:

http://accessla.org/about_us/title_vi.html

A printed copy of these pages is contained in **Appendix E**.

Included in the narrative is the statement that Access is "committed to providing services without regard to race, color or national origin." There are also instructions provided where a person may go to request additional information about Access' Title VI policies and practices. Finally, if a person wishes to file a Title VI complaint there is a link to Access' Title VI Complaint Form - a copy of which is included in **Appendix F** - and instructions as to how to file a Title VI complaint with Access and Access' Title VI complaint process.

2. Access Services Customer Rider's Guide

Each of Access' eligible customers receives a copy of a Rider's Guide which provides guidance as to how to effectively utilize paratransit service in Los Angeles County. Contained in the Rider's Guide is one page dedicated to Access' Title VI commitment. A copy of the text of this page from the Rider's Guide is contained in **Appendix G**.

Similar to what is contained on Access' website, the text included in the Rider's Guide also states that Access Services is "committed to providing services without regard to race, color or national origin." The Rider's Guide

also directs customers as to how to request more information about Access' Title VI nondiscrimination requirements and the means as to how to file a Title VI complaint.

By including Access' Title VI information in its Rider's Guide, is the most effective means to reach all of the agency's customers. All Access customers who may make use of Access paratransit service receive a copy of the Rider's Guide, whereas Access does not have any bus shelters or stations where Title VI policies could be posted. Also, although Access does have contractors operate its fleet of minivans, during peak times, Access contracts with independent taxi providers. In-vehicle postings would be a less effective means of reaching our customer population.

3. Posting of Title VI Policy in Public Spaces

Access currently posts its Title VI Policy Access' "public" spaces, this includes the reception area of its administrative offices in El Monte, California and at its Eligibility Centers.

A copy of the posted policy statement is contained in **Appendix H**.

4. Translation of Title VI Policy into Non-English Languages

Access' Rider's Guide is available in English and in Spanish, as per Access' Limited English Proficiency (LEP) Plan. Access' website has an internal link to the on-line Google Translate service, so information posted on Access' website can be reviewed in over 200 different languages through Google Translate and the Title VI information is also available for translation for members of the public who do not read English.

C. Requirement to Develop Title VI Complaint Procedures and Complaint Form

FTA Circular 4702.1B Chapter III, Section 6 requires that Access Services "develop procedures for investigating and tracking Title VI complaints filed against [the agency] and make [the] procedures for filing a complaint available to members of the public."

1. Title VI Complaint Form

Access developed a Title VI complaint form, which is available to the public (as presented in Access' Title VI procedures above) either by telephoning or mailing Access Services or by accessing the Complaint Form in the Title VI section of Access' website. A copy of Access' current Title VI Complaint Form is available for review in [Appendix F](#).

The Title VI Complaint Form contains spaces where a customer may fill out all of the information necessary for Access' Complaints Division to conduct an investigation and allows the customer an opportunity to provide a narrative description of his or her experience that is prompting the complaint.

2. Title VI Complaint Investigations

Part of Access' Customer Service staff is dedicated to investigating and responding to complaints. Once a Title VI complaint is received, the Complaints Division will gather the facts associated with the complaint and conduct an investigation on the matter.

As an added step involved in the handling of Title VI complaints, when Title VI complaints are received, copies of these complaints are sent to the Planning and Customer Service Department. The Planning Department conducts oversight of the complaint investigation process, tracking any complaints that come in, while the Customer Service Department responds to complaints.

The Planning Department will review all Title VI complaints received and also review the investigations conducted by the Customer Service Department to ensure that the matter has been resolved effectively.

The Planning Department also tracks the number of Title VI complaints that are received by the agency to report such information to the FTA and to determine if there are possible patterns of behavior occurring in Access' service area prohibited by Title VI protections.

3. Title VI Complaint Investigation Procedure

When a Title VI complaint is received by Access, this initiates an extensive investigatory process to both respond to the customer's concern as well as to understand the severity (if any) of possible Title VI violations.

- a. Any person who believes that he or she, individually, as a member of any specific class, or in connection with any disadvantaged business enterprise, has been subjected to discrimination prohibited by Title VI of the Civil Rights Act of 1964, the Americans with Disabilities Act of 1990, Section 504 of the Vocational Rehabilitation Act of 1973 and the Civil Rights Restoration Act of 1987, as amended, may file a complaint with Access Services. A complaint may also be filed by a representative on behalf of such a person. All complaints will be referred to the Customer Relations ADA Coordinator for review and action.
- b. In order to have the complaint considered under this procedure, the complainant must file the complaint no later than 180 days after:
 - a. The date of alleged act of discrimination; or
 - b. Where there has been a continuing course of conduct, the date on which the conduct was discontinuedIn either case, Access Services may extend the time for filing or waive the time limit in the interest of justice, as long as Access Services specifies in writing the reason for so doing.
- c. Complaints shall be in writing and shall be signed by the complainant and/or the complainant's representative. Complaints shall set forth as fully as possible the facts and circumstances surrounding the alleged discrimination. In the event that a person makes a verbal complaint of discrimination to an officer or employee of Access Services, the person shall be interviewed by the Human Resources Manager. If necessary, the Customer Relations Coordinator will assist the person in reducing the complaint to writing and submit the written version of the complaint to the person for signature. The complaint shall then be handled according to Access Services' investigative procedures.
- d. Within 10 days, the Customer Service Department will acknowledge receipt of the allegation, inform the complainant of action taken or proposed action to process the allegation and to advise the complainant of other avenues of redress available, such as the Federal Transit Administration (FTA).

- e. Upon request by FTA, Access can advise FTA of the details associated or alleged in the complaint. Generally, the following information will be included in every notification to the FTA:
 - a. Name, address and phone number of the complainant.
 - b. Name(s) and address(es) of alleged discriminating official(s)
 - c. Basis of complaint (i.e. race, color, national origin or sex)
 - d. Date of alleged discriminatory act(s)
 - e. Date of complaint received by the recipient
 - f. A statement of the complaint
 - g. Other agencies (state, local or Federal) where the complaint has been filed
 - h. An explanation of the actions Access Services has taken or proposed to resolve the issue in the complaint.
- f. Within 60 days, the Customer Service Department will conduct an investigation of the allegation and based on the information obtained, will render a recommendation for action in a report of findings to the Executive Director. The complaint should be resolved by informal means wherever possible. Such informal attempts and their results will be summarized in the report findings
- g. Within 90 days of receipt of the complaint, the Executive Director will notify the complainant in writing of the final decision reached, including the proposed disposition of the matter. The notification will advise the complainant of his/her appeal rights with the FTA, if they are dissatisfied with the final decision rendered by Access Services. The Customer Relations will also provide the FTA with a copy of the decision and summary of findings upon completion of the investigation.
- h. Contacts for the different Title VI administrative jurisdictions are as follows:

Federal Transit Administration, Office of Civil Rights
Attention: Title VI Program Coordinator
East Building, 5th Floor - TCR
1200 New Jersey Avenue, S.E.
Washington D.C. 20590

D. Requirement to Record and Report Transit-Related Title VI Investigations, Complaints and Lawsuits

FTA Circular 4702.1B, Chapter III, Section 7 states that a recipient of Federal assistance must "prepare and maintain a list of any of the following that allege discrimination on the basis of race, color or national origin: Active investigations conducted by entities other than the FTA; lawsuits and complaints naming the recipient. This list shall include the date that the investigation, lawsuit or complaint was filed; a summary of the allegation(s); the status of the investigation, lawsuit, or complaint; and actions taken by the recipient in response or final findings related to the investigation, lawsuit or complaint. This list shall be included in the Title VI Program submitted to FTA every three years."

In addition to performing full investigations on Title VI complaints as Access' Customer Relations Division performs on all complaints received against Access, the following added steps have been included to ensure proper tracking of such complaints:

"All Title VI complaints will be addressed to the Customer Relations ADA Coordinator to confirm receipt. The complaint will then be entered by an assigned Customer Relations Associate. An e-mail notification will be generated and addressed to Government Services, the Project Administrators and the Customer Relations Department. Within 60 days, an investigation of the allegation will be conducted and based on the information obtained; the Customer Relations Department will render a recommendation for action in a report of findings to the Executive Director. Within 90 days of receipt of the complaint, the Executive Director will notify the complainant in writing of the final decision reached, including the disposition of the matter." (Customer Relations policies, September, 2013).

In the past three years Jan. 2019-Jan. 2022, Access has not received any (0) complaints that allege Title VI issues. The tracking table included in **Appendix I** would be used to summarize complaints filed and their resolution. As no complaints were filed between January 2022 and January 2025, a sample of the table is included.

E. Promoting Inclusive Public Participation

FTA Circular 4702.1B, Chapter III, Section 8 sets forth that each recipient must establish a “public participation plan or process (i.e. a document that explicitly describes the proactive strategies, procedures, and desired outcomes that underpin the recipient’s public participation activities).”

Access is committed to reaching out to its customers to both receive input from our customers about Access’ service and also to educate our customers about changes taking place with Access’ paratransit operations.

To fully capture the extensive public engagement efforts that Access has pursued, the agency has created a separate Public Participation Plan document. This Public Participation Plan has been attached to this document as **Appendix J**.

F. Requirement to Provide Meaningful Access to LEP (Limited English Proficiency) Persons

FTA Circular 4702.1B, Chapter III, Section 9 encourages recipients to “take reasonable steps to ensure meaningful access to benefits, services, information and other important portions of their programs and activities for individuals who are limited-English proficient (LEP).”

To comply with FTA Circular 4702.1B and Executive Order 13166 “Improving Access to Services for Persons with Limited English Proficiency,” Access has introduced a number of processes to ensure that individuals are able to effectively access the paratransit resources that Access offers the Los Angeles County community.

As there have been extensive efforts undertaken by Access and for the purpose of providing a thorough analysis of the required four-factor analysis, Access has created a separate Limited English Proficiency Plan. Access’ Limited English Proficiency Plan has been attached to this document as **Appendix K**.

G. Minority Representation on Planning and Advisory Bodies

FTA Circular 4702.1B, Chapter III, Section 10 states that “a recipient may not, on the grounds of race, color or national origin, ‘deny a person the opportunity

to participate as a member of a planning, advisory, or similar body which is an integral part of the program.’ Recipients that have transit-related, non-elected planning boards, advisory councils or committees, or similar committees, the membership of which is selected by the recipient, must provide a table depicting the racial breakdown of the membership of those committees and a description of efforts made to encourage the participation of minorities on such committees.”

Table 1 is based off of the table contained in FTA Circular 4702.1B and presents the percent minority and non-minority of the members of Access’ three governing bodies, our Board of Directors, Community Advisory Committee (CAC) and Transportation Professionals Advisory Committee. Due to some CAC members having stepped down over the past months from their role in the Committee, there are fewer than fifteen voting members currently on that committee.

As demonstrated in **Table 1**, Access has minority representation on each of its governing bodies, which is a reflection of the Los Angeles County community which Access serves.

Access employs a variety of methods to encourage persons active in the paratransit, transit and disability communities to apply for positions on Access’ governing bodies. Below are the means used to encourage individuals to volunteer for our governing bodies and how those means also encourage minority representation on the Board and advisory committees.

1. Access Services Board of Directors

The selection process for Access’ Board members is performed apart from Access Services. Access works with the below County-wide/local organizations to have the most qualified representatives on Access’ Board representing the interests of Access and its customers.

When a vacancy is approaching for the Board, Access will inform the appointing body of the upcoming vacancy and that agency will begin a selection process, out of Access’ influence, to determine the most qualified person to fill the vacancy position.

TABLE 1
MINORITY REPRESENTATION ON ACCESS BOARD AND ADVISORY COMMITTEES (August 2025)

Governing Body	Total Board & Committee Members	Percent White	Percent Latino	Percent African-American	Percent Asian-American	Percent Other	Percent Two or More Races	Percent Response Rate
Access Services Board of Directors	9	44.4%	11.1%	11.1%	11.1%	0.0%	0.0%	77.8%
Community Advisory Committee (CAC)	12	33.3%	25.0%	8.3%	0.0%	0.0%	8.3%	69.2%
Transportation Professionals Advisory Committee (TPAC)	15	13.3%	13.3%	13.3%	6.7%	13.3%	6.7%	66.7%

* As of August 2025 almost half of all members of Access' Board, CAC and TPAC have self-reported.

Below are the different County-wide/local bodies which appoint one person to Access' Board of Directors.

- The County of Los Angeles Board of Supervisors
- City Selection Committee's Corridor Transportation Representatives
- Mayor of the City of Los Angeles
- Governing boards of the municipal fixed-route operators
- Governing boards of the local fixed-route operators
- Los Angeles County Commission on Disabilities
- Los Angeles County Independent Living Centers
- Los Angeles Metro staff
- Local fixed-route operators and municipal fixed-route operators (rotating appointment)

2. Community Advisory Committee (CAC)

As contained in the CAC Bylaws, diverse representation is encouraged as an element in selecting voting representatives to the committee.

"The Access Services Board of Directors shall appoint a slate of fifteen (15) Los Angeles County residents comprised of persons with disabilities or, where needed, persons with knowledge of specific disabilities to the CAC following receipt of an application for CAC membership and a personal interview with by the Access Services staff liaison. Representatives shall be appointed to ensure that the committee reflects both diversity across various types of disabilities and regional diversity across the geographic area being served by Access Paratransit." (CAC Bylaws, Page 1).

At the time of this writing, the CAC had thirteen (14) members with one (1) vacancy.

3. Transportation Professionals Advisory Committee (TPAC)

Access' TPAC is draws its membership from across Los Angeles County and surrounding counties, seeking professionals with very diverse backgrounds in the fields of transit, paratransit and social service. The TPAC Bylaws present how members are selected for the committee.

"The Committee consists of 15 voting members [plus alternates (currently 25 total voting members and alternates)] comprised of transit,

paratransit and social service transportation professionals representing all regions of Los Angeles and surrounding counties. Members are approved by the Access Services Board of Directors according to criteria that ensures the committee represents the public transportation community. . . .”

“Applications to TPAC membership are submitted to [Access] staff for review. A membership subcommittee comprising of two to three TPAC committee members will review and consider the application and may forward to the Board for approval. (TPAC Bylaws, Page 1)

At the time of this writing the TPAC had fifteen (15) members.

H. Requirement to Monitor Subrecipients

Access Services does not oversee any subrecipients of Federal funds. Access, however, does maintain contracts with different private transportation providers to perform the transportation and eligibility functions of Access' services. These contractual relationships do not require separate Title VI documents to be prepared by the different providers of services, but it does require that Access thoroughly investigate any Title VI complaints brought against their drivers or staff as if it were brought against Access itself.

All complaints of Access' different service providers are routed through Access Customer Service Department. Any Title VI complaints that are received against a service provider of Access Services would receive the same scrutiny as though it were filed against Access Services itself.

For a review of Access' Title VI complaints investigation procedures, please refer to Section C, 2 of this Title VI Program report.

If you would like to file a discrimination complaint against Access and/or its contractors, the complaint must be filed within 180 days. Please follow the procedures listed below in Access Services Discrimination Complaint Procedure.

Access Services Discrimination Complaint Procedure

1. Any person who believes that he or she, individually, as a member of any specific class, or in connection with any disadvantaged business enterprise, has been subjected to discrimination prohibited by Title VI of the Civil Rights Act of 1964, the American with Disabilities Act of 1990, Section 504 of the Vocational Rehabilitation Act of 1973 and the Civil Rights Restoration Act of 1987, as amended, may file a complaint with Access Services. A complaint may also be filed by a representative on behalf of such a person. All complaints will be referred to the Customer Relations ADA Coordinator for review and action.
2. In order to have the complaint considered under this procedure, the complainant must file the complaint no later than 180 days after:
 - a) The date of the alleged act of discrimination; or
 - b) Where there has been a continuing course of conduct, the date on which that conduct was discontinued.

In either case, Access Services may extend the time for filing or waive the time limit in the interest of justice, as long Access Services specifies in writing the reason for so doing.

3. Complaints shall be in writing and shall be signed by the complainant and/or the complainant's representative. Complaints shall set forth as fully as possible the facts and circumstances surrounding the alleged discrimination. In the event that a person makes a verbal complaint of discrimination to an officer or employee of Access Services, the person shall be interviewed by the Customer Relations ADA Coordinator. If necessary, the Human Resources Manager will assist the person in reducing the complaint to writing and submit the written version of the complaint to the person for signature. The complaint shall then be handled according to Access Services' investigative procedures.

4. Within 10 days, the Customer Support Center will acknowledge receipt of the allegation, inform the complainant of action taken or proposed action to process the allegation, and advise the complainant of other

avenues of redress available, such as the Federal Transit Administration (FTA).

5. Upon request by FTA, Access can advise FTA of the details associated alleged in the complaint. Generally, the following information will be included in every notification to the FTA:
 - a) Name, address, and phone number of the complainant.
 - b) Name(s) and address(es) of alleged discriminating official(s).
 - c) Basis of complaint (i.e., race, color, national origin, or sex)
 - d) Date of alleged discriminatory act(s).
 - e) Date of complaint received by the recipient.
 - f) A statement of the complaint.
 - g) Other agencies (state, local, or Federal) where the complaint has been filed.
 - h) An explanation of the actions Access Services has taken or proposed to resolve the issue in the complaint.
6. Within 60 days, the Customer Support Center will conduct an investigation of the allegation and based on the information obtained, will render a recommendation for action in a report of findings to the Executive

Director. The complaint should be resolved by informal means whenever possible. Such informal attempts and their results will be summarized in the report of findings.

7. Within 90 days of receipt of the complaint, the Executive Director will notify the complainant in writing of the final decision reached, including the proposed disposition of the matter. The notification will advise the complainant of his/her appeal rights with the FTA, if they are dissatisfied with the final decision rendered by Access Services. The Customer Relations ADA Coordinator will also provide the FTA with a copy of this decision and a summary of findings upon completion of the investigation.

8. Contacts for the different Title VI administrative jurisdictions are as follows:

APPENDIX K
ACCESS SERVICES
LIMITED ENGLISH PROFICIENCY PLAN

APPENDIX L
ELEMENTS OF FTA C 4702.1B
NOT-APPLICABLE TO ACCESS SERVICES

Access' Title VI Report was prepared pursuant to FTA Circular 4702.1B Title VI Requirements and Guidelines for Federal Transit Administration Recipients and reflects the policies of Access Services.

Access Services is a public transit agency designed to administer and manage the delivery of complementary Americans with Disabilities Act (ADA) paratransit service.

Access does not provide any fixed route services nor does its curb-to-curb transportation service require or utilize any station or depot facilities for passenger pick-ups and drop-offs.

FTA C 4702.1B - Chapter IV - Does Not Apply to Access Services

Chapter IV of FTA circular 4702.1B sets forth the guidelines for Fixed Route Transit Providers. Access Services, by its nature as a Paratransit provider, does not operate any fixed route bus or rail service. For this reason, Access' Title VI requirements are contained exclusively in Chapter III (General Requirements and Guidelines). Access current Title VI Plan lists Access' compliance with the General Requirements and Guidelines set forth in Chapter III of FTA circular 4702.1B.

Equity Analysis Regarding Construction Projects - Does Not Apply to Access Services

Access Services' principal service is to provide curb-to-curb transportation to customers of its service. Access does not maintain public stations or depots for customers to transfer from one "route" to another and/or to board particular paratransit "routes."

Access also does not foresee any reason that it would become involved in overseeing the construction of any public transportation facility.

It is for the above reasons that discussion associated with Access' equity analysis responsibilities associated with facility construction was not included in Access' Title VI Plan as Access would not pursue the construction of a facility to aid our customers in accessing our transportation services.

ACCESS SERVICES
LOS ANGELES COUNTY

LIMITED ENGLISH PROFICIENCY (LEP) PLAN

AND

LANGUAGE ASSISTANCE PLAN

OCTOBER 2025 TO SEPTEMBER 2028

I. Introduction

Access Services is the Americans with Disabilities Act (ADA) Paratransit provider for Los Angeles County. Access Services, provides transportation services throughout the Los Angeles County basin, the San Gabriel and San Fernando Valleys as well as the north-county communities of Santa Clarita and the Antelope Valley. In providing the paratransit service for a County with approximately 10 million residents, Access Services does interact with individuals with varying degrees of ability to speak and/or understand English. For this reason, Access Services has developed this Limited English Proficiency Plan and Language Assistance Plan.

Persons, who have a limited ability to read, write, speak or understand English are Limited English Proficient or "LEP." In Los Angeles County, according to U.S. Census records and as will be presented later in this Plan, approximately 24.53% of the County's residents would describe themselves as not able to communicate in English very well.

This Limited English Proficiency Plan and corresponding Language Assistance Plan are drafted in accordance with the requirements of FTA's Circular 4702.1B Title VI Requirements and Guidelines for Federal Transit Administration Recipients (October 1, 2012) as well as Executive Order 13166 Improving Access to Services for Persons with Limited English Proficiency (August 16, 2000).

As stated in FTA Circular 4702.1B, "...recipients shall take reasonable steps to ensure meaningful access to benefits, services, information, and other important portions of their programs and activities for individuals who are limited-English proficient (LEP)."

The U.S. Department of Transportation handbook, titled "*Implementing the Department of Transportation's Policy Guidance Concerning Recipients' Responsibilities to Limited English Proficient (LEP) Persons: A Handbook for Public Transportation Providers, (April 13, 2007)*" (hereinafter "Handbook"), states that Title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d et seq., and its implementing regulations provide that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity that receives Federal financial assistance (*Handbook, page 5*).

The *Handbook* further adds that Title VI prohibits conduct that has a disproportionate effect on LEP persons because such conduct constitutes national origin discrimination (*Handbook, page 5*).

Recipients of FTA assistance are encouraged to use the DOT LEP Guidance to determine how best to comply with statutory and regulatory obligations to provide meaningful access to the benefits, services, information and other important portions of their programs and activities for individuals who are LEP. (*Handbook, page 6*)

For many LEP individuals, public transit is a principal transportation mode used. It is extremely important that Access Services is able to communicate effectively with all of its riders, both LEP and non-LEP individuals alike. When Access Services is able to communicate effectively with all of its customers, the service provided is a safer, more reliable, convenient and accessible for all of the agency's customers. For these reasons, Access Services is committed to taking reasonable steps to ensure meaningful access for LEP individuals to this agency's paratransit services.

This Plan will demonstrate the efforts that Access Services has undertaken to make its service as accessible as possible to all persons irrespective of their ability to communicate using the English language. Additionally, Access Services does welcome any comments or suggestions that would further improve the effectiveness of this Plan and/or our ability to communicate more effectively with our customers.

II. FOUR-FACTOR ANALYSIS

The analysis provided in this report has been developed in order to ensure that Access Services provides language assistance to Limited English Proficient (LEP) persons. FTA Circular 4702.1B spells out the steps necessary to prepare a comprehensive LEP plan. The circular recommends a four-factor analysis be performed. The sections that follow constitute Access Services' Four-Factor Analysis.

A. Factor 1: The Number or Proportion of LEP Persons Eligible to be Served or Likely to be Encountered by the Program or Recipient

Guidance from executive Order 13166 (65 FR 159) states "... A factor in determining the reasonableness of a recipient's efforts is the number or proportion of people who will be excluded from the benefits or services absent efforts to remove language barriers." In essence, "the greater the number or proportion of LEP persons from a

particular language group served or encountered in the eligible service population, the more likely language services are needed."

1. Factor 1, Step 1: Identify How LEP Persons Interact with the Recipient's Agency.

Access Services is the ADA complementary paratransit provider for Los Angeles County. There are a variety of ways that Access staff comes in contact with applicants for the service, customers of the service and Personal Care Attendants and guests of the customers.

- 1) Application Process: For a person to receive paratransit eligibility, that person must first request an Access application form, from Access' Customer Service Division. This interaction is performed through a telephone call with the Customer Service Division. The application may also be requested on-line through Access' website.

Currently, for customers who are unable to speak or understand English, a majority of Customer Service Representatives employed by Access' customer service contractor (Alta at the time of this writing), are bi-lingual in both English and Spanish and beyond those languages, Access contracts with a telephone interpreting service agency ("Language Arts" at the time of this writing) who serve as a telephone interpreter service which an Access Customer Service Representative can conference-call in to a conversation and an interpreter representative can serve as the bridge between the caller and the representative of Access, so that the customer service representative need not speak the caller's language, but the caller is still able to speak and receive information in the language they are most comfortable using.

- 2) In-Person Evaluation Process: Following the completion of the application an applicant for Access will attend an in-person eligibility evaluation at Access' Eligibility Center in the City of Commerce, approximately 7 miles southeast of Downtown Los Angeles. There are satellite eligibility centers are in the North County communities of Palmdale and Santa Clarita, where the Cities of Commerce and of Los Angeles are distant destinations. The purpose of this in-person evaluation is to determine if the applicant's disability is sufficiently severe that they would not be able to ride the County's fixed route transit, but would be better served by paratransit transport.

If a person speaks a language other than English, MTM – the contractor who handles Access' in-person eligibility evaluations – takes certain steps. Many of MTM's evaluation staff are proficient in Spanish as well as English. If, however, the applicant speaks a language other than English or Spanish, MTM is able to contact the telephone interpreter service. During the in-person evaluation, in which the applicant must physically walk along a course inside of the Eligibility Center, the evaluator and applicant may listen to the interpreter representative through a mobile speaker-phone on a phone. The telephone interpreter service representative is able to translate what the applicant is saying to the evaluator and vice versa.

Access previously used telephone headsets for the evaluator and the applicant, however, this technology proved problematic and not as reliable as the current speaker-phone approach which is available on multiple devices.

- 3) Eligibility Appeals: If an applicant, following the in-person eligibility evaluation is determined to be ineligible for paratransit services, the applicant may appeal that determination. If the applicant is an LEP person, the appeals specialist is able to make use of the same telephone interpreter service that was available at the eligibility center. Access pays the expense for the call (as it does for calls made by MTM and its contractors) and allows the appeals specialist to concentrate on evaluating the applicant's argument to be found eligible for paratransit services.
- 4) Making Reservations and/or contacting Access: Once an applicant is found eligible for Access Services and is able to use the services of Access, much of their future communications with Access will be to make reservations for transportation. Trip reservations are made via telephone with one of six contractors Access retains in different parts of Los Angeles County. A map of Access' Service area is contained in **Appendix A**. Each of Access' contractors has a number of call-taker/reservation staff members who speak both English and Spanish. For individuals wishing to make trip reservations, but they do not speak English or Spanish, then the contractor staff can also contact Access' telephone interpreter service, for translation assistance, similar to the methods listed above.

Access has also introduced an On-Line Reservation Service for customers who may prefer to reserve their paratransit trips on-line. When a customer

may use this service, the web-based information exists in English and Spanish-language web-pages, however, a customer may also use a "translate" button and through Google Translate, the On-Line Reservations page may be translated into dozens of different languages to meet the Access customer's needs.

- 5) Traveling On Access: The principal service that Access provides its customers is paratransit transportation, which is a Next Day curb-to-curb service. During transit, there should be limited need for a customer to communicate with an operator as the trip is already in process and the starting point and ending point are automatically transmitted to the van operator's onboard computer (MDT).

As shown above, Access has developed a variety of methods for reaching out to all of our customers, including those with limited English proficiency.

- 6) Mobile Application and On-Line Applications

Access has introduced two services that make use of mobile application software and internet software. Web-pages for these web-based products are available in English and also translated into Spanish.

The Where's My Ride mobile application allows a customer to see how close their vehicle is to arriving at the customer's pick-up location within fifteen minutes of the scheduled arrival time.

Persons with limited English proficiency can utilize the app just as effectively as one who does speak English. The reason for this is the app, though originally designed in English can be translated into other languages depending upon the preferred language setting set on the individual's mobile phone. So English content will be translated into the customer's preferred language automatically.

Access also has On-Line Reservations, which is a program that permits customers to reserve trips on Access through an on-line booking portal (mentioned earlier). With this program, a customer need not speak with an Access contractor reservationist to book their trip.

Similar to the Where's My Ride application, On-Line Booking is accessible to persons with limited English proficiency. Again, the On-Line Booking

program will translate the English language elements depending upon the individual's preferred language that they set for their mobile phone or computer interface.

Both of these programs have provided improved options for customers in how they schedule their personal time. It is Access' intent that these services will benefit Access customers who are interested in using these on-line/mobile application services irrespective of a customer's primary language.

2. Factor 1, Step 2: Identify LEP Communities, and Assess the Number or Proportion of LEP Persons from each Language Group to Determine the Appropriate Language Services for each Language Group.

Access Services provides paratransit services throughout Los Angeles County. Please see **Appendix A** for a map of Access' service area. This section will draw data from the U.S. Census to show the variety of languages spoken in Los Angeles County.

Using the U.S. Census' American Community Survey 1-Year Estimate (2019), and drawing from the Report "Language Spoken at Home by Ability to Speak English for the Population 5 Years and Over" for Los Angeles County, there are approximately 42 recognized languages (or language groups) spoken in Los Angeles County.

Table 1 summarizes the variety of languages in use in Los Angeles County and the percentage and number of people who reported speaking English less than "very well" to the U.S. Census. As shown in **Table 1**, throughout Los Angeles County, there are 27 languages or language-groups the Census' American Community Survey 5 Year Estimates (2015-2020) identifies as being spoken, with 21 such languages or language-groups with communities of 1,000 or more people indicating that they speak English less than "very well."

Of the variety of languages spoken in Los Angeles County, Spanish, is the most commonly spoken language by persons who associate themselves as speaking English less than "very well." A total of 1.63 million residents of Los Angeles County (or 17.3% of the County's population, indicate that they speak English less than "very well."

Data Source, U.S. Census American Community Survey 5 year

Estimates (2015-2020)

Data Set: "Language Spoken at Home by Ability to Speak

English for the Population 5 Years and Over"

The next largest language groups spoken in Los Angeles County are Chinese, Korean and Armenian with much smaller percentages who identified as speaking English “less than ‘very well’” in comparison to Spanish (1.54% Chinese; 1.18% Korean and 0.90% Armenian).

For all of these language groups listed above, and several more, Access provides telephone translation services so that customers and members of the public can receive information about Access from applying for the service to requesting transportation.

3. Factor 1, Step 3: Identify the Literacy Skills of LEP Populations in Their Native Languages, in Order to Determine Whether Translation of Documents will be an Effective Practice.

Access has made information about its service available in a variety of ways and in multiple languages. For Los Angeles County, the U.S. Census American Community Survey provides information about “spoken” language skills, but not about literacy skills in English or other languages.

Despite not having information regarding literacy levels, Access has already developed means by which Access customers and/or members of the public may read Access’ information in a great variety of methods.

All documents important for customers of Access to review are available in English and also in Spanish, this includes Access’ application, Rider’s Guide, and Community Meeting notices.

Additionally, Access’ Rider’s Guide and Community Meeting notices are available through Access’ website (www.accessla.org). Notices of community meetings and the text of the entire Riders’ Guide is available on Access’ website and can be translated (using a link contained on the Access website) through “Google Translate” into over 100 languages.

Information about applying for Access is also available through Google Translate in a variety of languages, and it instructs potential applicants to telephone Access for further information. Additionally, as mentioned above, as needed operators can communicate with a customer through Access’ telephone interpreter service.

4. Factor 1, Step 4: Identify Whether LEP Persons Are Underserved by the Recipient Due to Language Barriers.

Access recognizes the importance of its transportation services to its customers and has used a variety of technology improvements to ensure that individuals who benefit from Access' services do not face barriers to receive such services and effectively receive the benefits they need.

Telephone Interpreter Service: Access provides a telephone translation service which allows customers to apply for service, go through the in-person eligibility process, reserve transportation and ask questions in their native language without facing a barrier due to being Limited English Proficient.

Physical and On-Line Translation of Documents: Additionally, all of Access' important customer documents are printed in English and Spanish and Access' important customer documents are also available on-line and can be translated through an on-line "Google Translate" service (an example of an important customer document would be the Access Services Riders' Guide).

Access – in its contractual agreement with Language Arts – can have requested documents translated by this translation service into dozens of languages if requested by an Access customer or member of the public.

At this time, Access believes that its work has removed the language barriers that may have existed in the past, which could have made it difficult for individuals to apply for or use Access' paratransit services.

Access is always seeking to improve its services and welcomes suggestions from our customers, partners and FTA.

B. Factor 2: The Frequency with which LEP Persons Come into Contact with the Program.

The purpose behind this second factor of the four-factor analysis is provided in the FTA's Handbook on implementing policy guidance to LEP persons. In this factor, "recipient should assess, as accurately as possible, the frequency with which they have or should have contact with LEP individuals from different language groups seeking assistance, as the more frequent the contact, the more likely enhanced language services will be needed" (Handbook, April, 2007, p. 18).

A very effective way that Access can determine the frequency with which this agency comes in contact with LEP persons are the records that Access maintains associated with its telephone interpreter service.

Unlike other public transit systems, Access' customers must reserve a paratransit trip in advance. This is generally done by way of a telephone call to Access in order to receive transportation. A growing number of trips are now reserved using Access' on-line reservations process, however, the majority of reservations remains an over-the-phone process. When a customer (or even a person who is not currently a customer of Access) telephones Access and the caller does not speak English, the Access operator connects with Access' telephone interpreter service.

Table 2 provides a summary of the frequency that interpreter services were used by Access operators between January 2022 and May 2025. During this nearly three and a half year period, the interpreter service was utilized by Access' call center/Customer Service staff, its Provider staff and its Eligibility/Appeals staff in over 57,000 conversations with interpreters for 58 different languages.

Table 3 presents a summary of the languages that received more frequent interpreter requests (between 930 and 14,100 times a specific language sought for translation over the course of three and a half years [January 2022 to May 2025]). The most frequent 10 languages accounted for 97.06% of all requested languages through Access' language translation service.

In the past, the most common requested language was Spanish, which reflects Access' policy of having its important documents available in Spanish as well as English. However, the frequency of seeking language translation for Spanish through the telephone language line has fallen in recent years. This is a reflection that many call-center staff at Access and at Access' contractors are fluent in both Spanish and English.

What the data in these tables provides is two-fold (1) there are a number of LEP persons that Access regularly comes in contact with in the course of providing its service throughout Los Angeles County and (2) Access is performing a very effective job of adapting its service to communicate with the public and the agency's diverse customer base.

Total Language Line Requests:		34,531	100.00%
Total Translation Requests of Most Frequently Requested languages:		33,384	96.7%

1. Factor 2, Step 1: Use of Bus and Rail Service.

As addressed above, Access Services operates only paratransit, curb-to-curb and next-day service. In order for customers (LEP and non-LEP) to utilize Access' transportation services, they must make telephone reservations the day before (or the on-line booking service).

In these instances, Access can effectively respond to the concerns of LEP customers with the telephone interpreter services. However, with Spanish as the most frequently spoken language other than English by Access' customer base, it is common for many of the Access and service provider telephone operator staff to be fluent in both English and Spanish. Additionally, Access' on-line booking service will translate into the language selected by the individual in their mobile device.

2. Factor 2, Step 2: Purchase of passes and tickets through vending machines, outlets, websites and over the phone.

Again, Access Services' paratransit operations are different from other public transit forms. To utilize Access, a customer must have an Access identification card.

An Access customer will only receive this identification card upon successfully receiving paratransit eligibility through Access' eligibility center.

Similar to Step 1 above, Access has effectively removed language barriers for our agency's customers by providing language interpreter services over the telephone to arrange eligibility and make transportation reservations as well as to make translation services available through mobile speaker-phones during the in-person session of the eligibility evaluation so that a LEP person may effectively communicate with their evaluator.

3. Factor 2, Step 3: Participation in public meetings.

Public Outreach Meetings:

Access participates in a variety of public meetings/public outreach sessions and conducts its own annual community meetings every year throughout Los Angeles County.

Generally, regional centers, senior centers or other social service center request presentations on the types of service that Access provides to persons with disabilities.

It is common that these outreach meetings can be held in minority and/or LEP communities. In such cases, the event organizer (social center) will arrange to provide an interpreter to be present at the event, if it is anticipated that there will be a number of LEP individuals attending the meeting who would need language assistance in a language other than English.

Appendix B provides a list of over 300 different public meetings and outreach meetings conducted between July 2022 and June 2025. **Appendix C** presents a map of Los Angeles County with map-pins showing the different public meeting locations.

The table and map are intended to demonstrate Access' commitment to conducting these public meetings throughout Access' Los Angeles County service area.

Annual Access Community Meetings:

Each year Access conducts two (2) Community Meetings per year. One in the Autumn and one in the Spring. Since the COVID-19 pandemic, Access has conducted these meeting virtually via the Zoom on-line platform, which has been able to reach a larger audience than previous in-person meetings.

Notice of these meetings is provided in English and in Spanish in mailings, emails and also in "seat drops" on board Access vehicles. Meetings are presented in English with live translation in Spanish. Attendees may choose to see the presentations, but hear the Spanish-language translation in real-time. If requested, Access will provide a sign language interpreter, materials in Braille, or language interpreter for persons with limited English proficiency who do not speak either English or Spanish.

Public Governance Meetings:

At this time, language interpreters are not present at Access' Board of Directors meeting, however, were need for such to arise at a meeting, a public comment made could be performed through the assistance of the telephone interpreter service Access has through its other communications. The means by which this would be effectuated would be an Access staff representative would be directed by the Board to discuss the matter directly with the person. The staff member could communicate through the

interpreter service and afterwards the staff member would record the person's comment and ensure that it is received by the Board of Directors.

4. Factor 2, Step 4: Customer Service Interactions.

As addressed in earlier sections, Access' contracted Customer Service staff members are able to effectively communicate with LEP persons through either being one of the many Access call-taker staff members who speaks both English and Spanish or rather the call-taker staff member may connect with the telephone interpreter service Access contracts with and thus proceed with the conversation with the assistance of the interpreter.

5. Factor 2, Step 5: Ridership surveys.

Access has conducted satisfaction surveys of its customers for several years and will be conducting another Customer Satisfaction Survey of its population of current Access riding customers in January/February of 2026 with results expected in April 2026.

All active Access customers (those who had taken at least one Access trip in the previous six months), are included as a possible person to contact as part of the survey.

Table 4 presents the results uncovered from the 2024 Customer Satisfaction Survey. The vast majority of Access customers primarily speak either English (76.6%) or Spanish (12.6%) at home. Other languages that were indicated by respondents in the survey did not exceed 1% of respondent answers.

This reinforces Access' practice of providing its printed material in English and in Spanish for the agency's customers and applicants.

6. Factor 2, Step 6: Operator surveys.

Access' conducts ridership/customer surveys, as discussed in the section above, for the agency's customer population.

No other surveys are conducted at this time, by the individual service providers. Access' next customer survey will be conducted in 2026 and Access conducts customer surveys annually.

C. Factor 3: The Nature and Importance of the Program, Activity or Service Provided by the Program to People's Lives

TABLE 4
ACCESS CUSTOMER SURVEY DATA (2024)
PRIMARY LANGUAGE SPOKEN AT HOME

Language	Total	Service Region					West/ Central
		Antelope Valley	Eastern	Northern	Santa Clarita	Southern

Source: 2024 Access Customer Satisfaction Survey Final Report (Jun 2024).

FTA Circular 4702.1B provides that for this factor of the analysis, "the more important the program, the more frequent the contact and likelihood that language services will be needed. The provision of public transportation is a vital service, especially for people without access to personal vehicles. . . . A person who is LEP may have a disability that prevents the person from using fixed route service, thus making the person eligible for ADA complementary paratransit. Transit providers, States and MPOs must assess their programs, activities and services to ensure they are providing meaningful access to LEP persons. Facilitated meetings with LEP persons are one method to inform the recipient on what the local LEP population considers to be an essential service, as well as the most effective means to provide language assistance."

Access Services provides ADA paratransit transportation services for Los Angeles County for 46 fixed route operators and partner organizations in the County of Los Angeles.

Access customers are individuals who through an in-person evaluation have demonstrated that they have a disability (disabilities) which would make it challenging, if not impossible, for them to make use of fixed route transit services.

Importance of Access Services' Activities

Access provides a unique and necessary service to its customers. For many of the agency's customers, without the option of Access, their mobility would be severely restricted.

It is in recognition of the importance of the services that Access provides that the agency has developed a variety of language assistance features to assist LEP persons (both current paratransit customers and members of the public):

- 1) Telephone Interpreter Services - available 24 hours a day/7 days a week
- 2) Access website internal link with "Google Translate" service to translate webpage information.
- 3) Printed material available in Spanish (the most common language spoken by Access customers/Los Angeles County residents outside of English).

D. Factor 4: The Resources Available to the Recipient for LEP Outreach, as well as the Costs Associated with that Outreach

FTA Circular 4702.1B provides that for this section "Resource and cost issues can often be reduced by technological advances, reasonable business practices, and the sharing of language assistance materials and services among and between recipients, advocacy groups, LEP populations and Federal agencies. Large entities and those entities serving a significant number of LEP persons should ensure that their resource limitations are well substantiated before using this factor as a reason to limit language assistance."

Access is committed to providing language assistance to LEP populations who need the service in order to receive the unique paratransit benefits that Access provides to Los Angeles County.

Access has incorporated a number of improvements into its service that ensure that LEP populations can receive information about Access.

Recent Access Improvements

Improvements that Access has made in recent years that has removed barriers for LEP persons include the following:

- 1) Access speaker-phone interpreter availability: At Access' eligibility center, LEP applicants did not need to bring their own interpreter with them to the in-person interview, but rather the applicant and the applicant's evaluator can proceed through the in-person evaluation while having their conversation translated through a speaker-phone connection. Previously, it was attempted to have evaluators and applicants wear telephone headsets, however, that approach proved more problematic than the current approach of using a mobile speaker-phone.
- 2) Access embedded a Google Translate link on Access website. This feature was developed by Access to allow for all of the information Access makes public on its website to be capable of being reviewed in dozens of languages easily and by any LEP population wishing further information about Access, from its Rider's Guide to Title VI complaint information.

If Access becomes aware of other areas where it should improve its methods of language assistance to LEP communities/persons, Access will develop such improvements.

Cost restrictions are ever-present during current periods of tight budget constraints, however, if there are improvements recommended by Access' customers, Access' partners or the FTA, Access will work to improve the services it provides to LEP persons.

If some - currently unknown - improvements turn out to be cost-prohibitive to institute, Access will work closely with its partners and FTA to determine a solution that will effectively meet the needs of LEP access and also not burden the agency's budget and risk reducing the quality of its service throughout.

III. Language Assistance Plan

FTA Circular 4702.1B requires that following the completion of the Four-Factor Analysis, the agency "shall use the results of the analyses to determine which language assistance services are appropriate" (FTA C 4702.1B, p. III-8).

There are a minimum of five (5) elements to the Language Assistance Plan spelled out in the FTA regulations. Those separate elements are addressed individually in the pages that follow.

A. Include the Results of the Four-Factor Analysis, Including a Description of the LEP Population(s) Served.

Access' Four-Factor Analysis presented earlier in this report. Access provides paratransit transportation services throughout the County of Los Angeles following the fixed route service area of our 46 partners.

There are a great many LEP communities that are present in Los Angeles County. For a summary of the communities with LEP populations and which language groups have members who speak English less than 'very well' - as per U.S. Census terms - please see **Table 1.** Table 1 also lists the largest LEP communities in Los Angeles County in order from largest to smallest population. Spanish is, by far the single largest non-English language spoken in Los Angeles County and also has the largest number of individuals who speak the English language less than 'very well.'

B. Describe How the Recipient (Access) Provides Language Assistance Services by Language.

Access has a variety of language assistance services that were included as part of the Four-Factor Analysis. The following bullet-points summarize those services.

- 1) Telephone interpreter service available accessed by Access Services call center staff; provider staff; Eligibility and Eligibility appeals staff, which allows persons to communicate effectively even if a language barrier would exist without the interpreter service;

In terms of the language assistance services by language, Access' Language-Arts telephone interpreter service offers interpreter services in over two hundred (200) languages.

- 2) "Google Translate" embedded feature on Access website. Information posted on the Access website can be viewed in English or - through a Google Translate link on the Access website - can be translated into any of dozens of languages, including the text of Access' Rider's Guide;

In terms of the language assistance services by language, "Google Translate" allows Access' web-based information to be translated into dozens of different languages.

- 3) Speaker-phone translation available at Access' Eligibility Center. If a customer arrives at Access' Eligibility Center and does not speak either English or Spanish and does not have a translator to assist them, an in-person evaluation can still be conducted easily. Through a mobile speaker-phone, the evaluator and applicant can communicate through Access' telephone interpreter service both in the evaluator's office as well as out on the physical evaluation course;

With respect to the language assistance services by language, Access' contracted telephone interpreter service (Language Arts) offers interpreter services in over two hundred (200) languages.

- 4) Printed materials provided in English and Spanish. Access' applications, Rider's Guide, Community meeting announcements are provided in both English and Spanish (the most common language spoken by Access customers as well as County residents next to English);

C. Describe How the Recipient (Access) Provides Notice to LEP Persons About the Availability of Language Assistance.

Access has developed its language assistance programs to be virtually automated, so that the customer/member of the public need not search for the assistance.

- 1) With respect to use of the telephone interpreter service, if a person calls Access' call center; one of Access' service providers or goes to Access' in-person eligibility center or the office of an eligibility appeals specialist, the call-taker or customer can identify the language they are speaking and the call-taker will then connect in with the telephone interpreter service after a brief hold period.
- 2) With respect to the "Google Translate" service embedded in Access' webpage, which allows persons viewing Access' website to translate information into any variety of languages, the "Choose Another Language" is on the left-hand side of Access' home page, so a customer can choose a language to translate information to as the first thing once they reach the internet page.
- 3) For customers of Access who must receive written information in Spanish or Braille, that language information is contained in Access' customer information database, so future written communications will be provided to that individual in their preferred language format.

Access has attempted to develop a system in which a customer need not "seek out" language assistance, but that that assistance is already available for those members of the public, applicants and customers who need some language assistance in order to fully participate at Access.

D. Describe How the Recipient (Access) Monitors, Evaluates and Updates the Language Access Plan.

Access staff will perform semi-annual checks with respect to the most requested languages through the telephone interpreter service to ensure that Access' does not need to develop new/different services for its customers, members of the public.

E. Describe How the Recipient (Access) Trains Employees to Provide Timely and Reasonable Language Assistance to LEP Populations

Similar to the response to "C" above, Access has worked to automate its language assistance services as much as possible. This not only applies to those customers, applicants and members of the public who call Access, but it also applies to the staff members at Access, its service providers and eligibility evaluators and appeals specialists who could reasonably expect to communicate with LEP persons.

As part of their overall training, call-takers are trained on how to access the telephone interpreter service and to effectively utilize that service to communicate with callers. Access and eligibility staff members are also trained on how to enter and review certain language information contained in the Access (Rider 360) database to ensure that correct written information is sent if a person can only receive Spanish language documents and/or Braille documents.

Access, provider and eligibility staff undergo training at the start of their employment and have periodic re-trainings at intervals set by their employer depending upon whether they are Access, provider or eligibility staff.

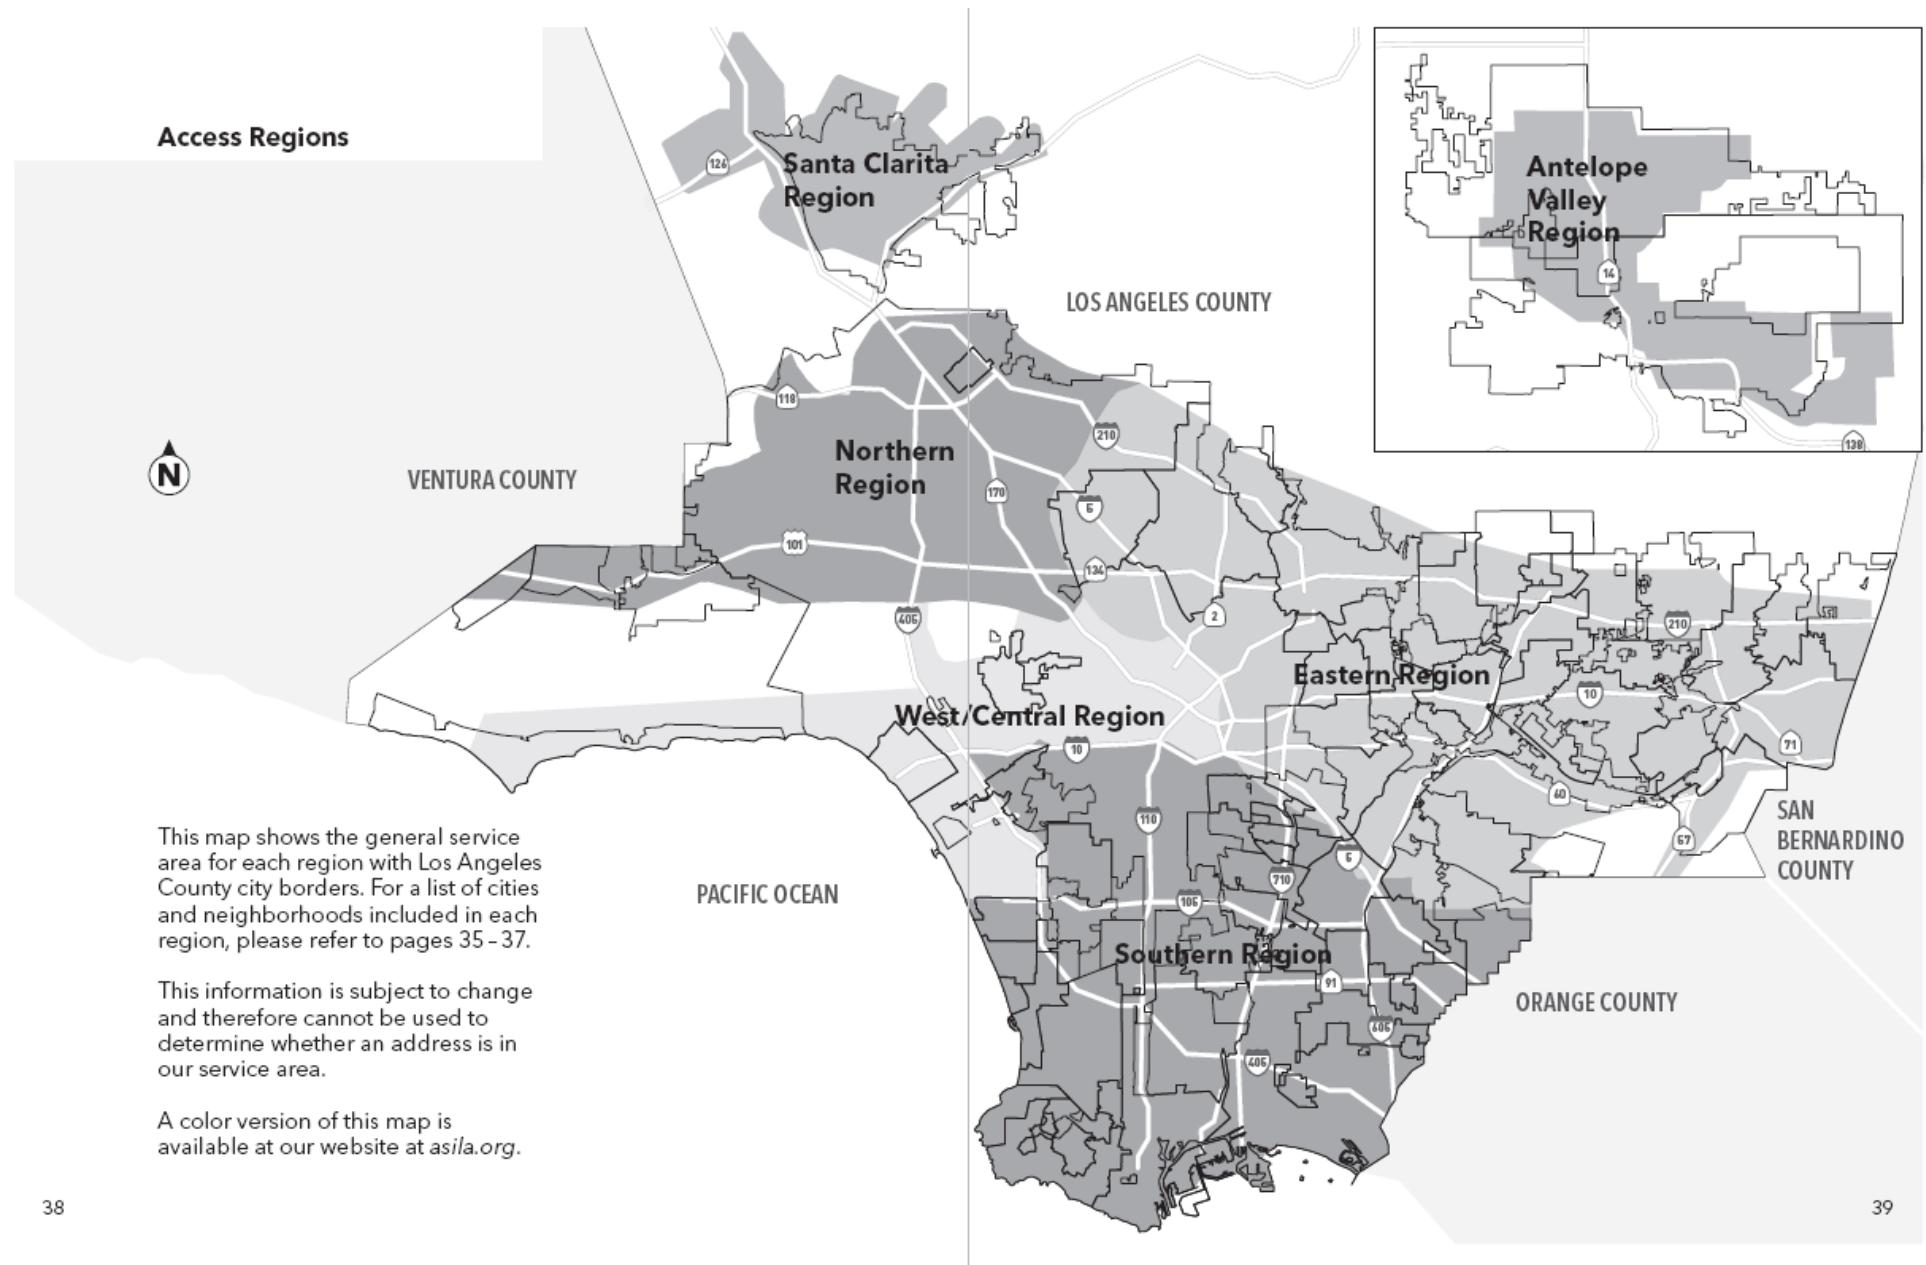

IV. Conclusion

Access has made a variety of improvements to its service to remove barriers that could prevent a person from receiving the benefits of ADA mandated paratransit transportation services. Access has worked to make access to language assistance programs as seamless as possible so that customers may receive the assistance as soon as they telephone Access or enter the agency's website.

Access is always working to provide better service for its customers and welcomes suggestions from its customers, its partners and the FTA. Access understands the necessary and valuable service that it provides to persons with disabilities and strives to ensure that those who need and would rely on the service do not face barriers to receiving such benefits.

ACCESS SERVICES
LOS ANGELES COUNTY

PUBLIC PARTICIPATION PLAN

OCTOBER 2025 - SEPTEMBER 2028

PUBLIC PARTICIPATION PLAN

I. Introduction

In accordance with Title VI of the Civil Rights Act of 1964, Executive Orders 12898 and 13166 and Federal Transit Administration (FTA) Circular 4702.1B, Access Services of Los Angeles County has developed this Public Participation Plan (PPP) to guide public involvement efforts and improve the ability of public involvement in Access Services' decision making process by low-income, minority and Limited English Proficiency (LEP) communities.

Purpose

Access Services' primary goal in developing this program is to ensure that all individuals who rely upon Access Services either as direct customers, family members, personal care assistants, care center or hospital staff, etc. are able to have a voice in the decision-making processes of Access Services' projects and programs. It is also a goal of Access Services to ensure that individuals and communities who may have historically had difficulty participating in public decision-making are able to participate in future decision-making, including low-income, minority and Limited English Proficiency (LEP) communities. To this end, Access Services conducts various meetings and community outreach with the hope of empowering low income, minority, and LEP communities throughout Los Angeles County in playing an active role in Access Services planning process.

FTA Circular 4702.1B states that with respect to planning public involvement measures:

The content and considerations of Title VI, the Executive Order on LEP, and the DOT LEP Guidance shall be integrated into each recipient's established public participation plan or process (i.e., the document that explicitly describes the proactive strategies, procedures, and desired outcomes that underpin the recipient public participation activities). Recipients have wide latitude to determine how, when, and how often specific public participation activities should take place, and which specific measures are most appropriate.

Recipients of Federal funding should make determinations based on the composition of the population affected by the recipient's actions, the type of public involvement process planned by the recipient and the resources available to the agency. Efforts to involve minority and low-income people in public involvement activities can include both comprehensive measures, such as placing public notices at all stations and in all vehicles, and measures to overcome linguistic, institutional, cultural, economic, historical, or other barriers that may prevent minority and low-income people and populations from effectively participating in a recipient's decision-making process (FTA C 4702.1B, p III-5).

The Public Participation Plan describes the overall goals, guiding principals and methods that Access Services uses regularly to reach out to low-income, minority and LEP communities. The Public Participation Plan aims to offer early and continuous opportunities for the public to be involved in the identification of social, economic and environmental impacts of proposed transportation decisions at Access Services.

Ways to do this include the scheduling of meetings aimed at accommodating minority and LEP communities, coordinating closely with community- and faith based organizations, educational institutions, and other organizations in conducting outreach targeted at minority and LEP communities, the consideration of a marketing strategy using various media sources that cater to LEP populations, and utilizing other means of communication other than writing, including the use of audio or video recording.

This Public Participation Plan is a tailored plan that describes how Access Services undertakes public involvement, information, education, participation and/or outreach activities.

Background

Access Services is a local public entity responsible for the administration of the American with Disabilities Act (ADA) mandated Los Angeles County Coordinated Paratransit Plan on behalf of forty-six (46) public fixed route operators including both bus and rail. Access Services provides next-day reservations for curb-to-curb transportation services for eligible riders who, due to a disability, are unable to utilize fixed route public transportation. The

work that Access Services performs is on a very "human scale", as each rider interactively arranges their reservation for transport and the vehicles Access Services utilize carry a small number of passengers. Perhaps because of Access Services' closeness to its customers, Access Services has a wide variety of avenues by which the customers/the public have an opportunity to communicate with and influence changes and improvements made to the service, as well as voice any of their concerns.

II. Access Services Public Involvement Opportunities

Access Services has a variety of committees that are designed to take comments from the public and from community organizations and are open for public comment. Also, Access Services ensures that all meetings held by these committees are held using methods and/or at locations that are accessible for individuals with disabilities and in locations that are accessible to public transit routes (as well as easily accessible by Access' own service). Furthermore, every effort is made to schedule all meetings at convenient times to the maximum extent practicable.

Access Services Board of Directors Monthly Meetings

As presented in the Organization Chart in **Appendix A**, overall guidance of Access Services is provided by its Board of Directors. The Board of Directors of Access Services has nine voting members selected from a variety of community associations throughout the County of Los Angeles invested in either local fixed route public transportation (4 seats), city and County government (3 seats) or the disability community (2 seats).

All meetings of the Access Services Board of Directors are open to the public and are often held on the 4th Monday of the month. The meetings are held at the Access Services headquarters in the city of El Monte. This location is accessible both from a disability perspective as well as from the perspective of being close to public transportation options.

These meetings are also able to be accessed virtually via Zoom. Meeting numbers and/or links have been provided on meeting agendas, Access' website home page and on the meetings page on Access' website.

Also on the board, as non-voting members are chairs of the Community Advisory Committee and Transportation Professionals Advisory Committee (both mentioned below). Upcoming Board of Directors' Meetings are posted on Access Services' website (accessla.org) along with meeting agendas.

Community Advisory Committee

The Community Advisory Committee (CAC), which meets on the second Tuesday of each month, was formed to provide input and advice to Access Services concerning operational policy issues for Access Services transportation program and to make recommendations to the Access Services Board and staff concerning the Access Services transportation program. CAC members play a very active role in the disability community and have education and expertise in areas dealing with paratransit in Los Angeles County. Members include Los Angeles County residents with disabilities or, where needed, persons with knowledge of specific disabilities relevant to Access Services. Meetings for the CAC are held virtually in Los Angeles County. Upcoming CAC meetings are posted on Access Services' website (www.accessla.org) along with meeting agendas.

The CAC consists of fifteen (15) members. To become a CAC member, customers must first submit an application. Applications are available in both English and Spanish on Access Services' website (www.accessla.org). Applications are reviewed by a subcommittee consisting of two CAC committee members and the Manager of Customer Services. This subcommittee then provides recommendations for consideration to the full CAC committee.

At the time of the writing of this Plan, there is one vacancy on the CAC committee following members ending their service on this committee.

Since the COVID-19 pandemic, CAC Committee meetings have been held virtually via Zoom. Meeting numbers and/or links have been provided on meeting agendas, Access' website home page and on the meetings page on Access' website.

Transportation Professionals Advisory Committee

The Transportation Professionals Advisory Committee (TPAC), which meets on the second Thursday of every other month, was formed to provide input and advice to the Access Services Board of Directors on operational and policy issues. The Committee consists of 15 voting members comprised of transit, paratransit, and social service transportation professionals representing all regions of Los Angeles and surrounding counties. Members are approved by the Access Services Board of Directors according to criteria that ensures the committee represents the public transportation community in Los Angeles County.

When a seat on TPAC is vacated, all stakeholders, including Access Services' member agencies and other specialized transportation organizations, are notified. All applications for TPAC membership are submitted by Access' member agencies or other specialized transportation organizations. A member subcommittee made up of two to three TPAC committee members. The applications are reviewed by the subcommittee and considerations are then forwarded to TPAC and the Board of Directors for approval. If the membership subcommittee receives applications from potential members and there are no vacancies in the committee, the applicant will be placed on the waiting list.

Just as the Board of Directors and CAC meetings, the meetings of the Transportation Professionals Advisory Committee are open to the public and members of the public may make public comment to this committee. Upcoming TPAC meetings are posted on Access Services' website (www.accessla.org) along with meeting agendas for individuals to attend.

Since the COVID-19 pandemic, these meetings have been held virtually via Zoom. Meeting numbers and/or links have been provided on meeting agendas, Access' website home page and on the meetings page on Access' website.

Semi-Annual Regional Community Meetings

Access Services' County-wide service is broken down into six separate service regions. Annually, Access Services hosts community meetings in each of the

six regions (See **Appendix B** for a service area map for Access Services). Two meetings are held virtually to both present to the Access Services customer community recent changes and improvements that have taken place with Access Services' service and also to hear comments and concerns from the ridership of the system.

These meetings are regularly scheduled to take place in Spring and in Autumn and are held regardless of whether or not changes have been implemented with Access Services that affect the customers of a region. These meetings are held to keep customers informed of the work that Access Services is doing as well as to respond to issues raised by members in the community.

Representatives from different departments provide brief updates on recent changes to the service and any other noteworthy items. After these addresses, the meeting is opened up to allow customers to ask questions and voice their comments or concerns.

The two meetings have an English-language presentation. Spanish language translation of the meeting is provided by live translators at the same time. Language translation services for languages other than English and Spanish and an American Sign Language translator is available upon request. A motivating factor in continuing to host these meetings via Zoom is to accommodate low income customers and encourage their attendance. In the past, when meetings were in-person, free trips to and from the community meetings were provided.

Notification of community meetings is posted on the Access Services website (www.accesssla.org) and each of the van-operating providers for each of the six regions place copies of flyers of the upcoming events in "take one" slots inside of the Access vans. Additionally, post cards may be mailed out to customers notifying them of the date and locations of upcoming meetings. **Appendix C** contains copies of flyers Access Services prepared for the most recent round of Community Meetings.

As a living document, Access Services' Public Participation Plan is intended to help customers play an active role in the shaping of Access Services' decision and policy making. More importantly, the PPP is meant to specifically target communities that have been left out of the process due to linguistic, institutional, cultural, economic, historic or other barriers.

Since the COVID-19 pandemic, these meetings have been held virtually via Zoom. Meeting numbers and/or links have been provided on meeting agendas, Access' website home page and on the meetings page on Access' website.

IV. Access Services Community Outreach Meetings

Due to the importance of the transportation service that Access Services provides the disability community in Los Angeles County, Access Services' Operations and Mobility Management staff coordinate with community based organizations and attend multiple community group meetings to share information about what Access Services is and how individuals can utilize paratransit.

These outreach meetings are held at a variety of community centers throughout Los Angeles County ranging from transitional high schools, senior centers, community centers, libraries, local churches and other religious centers.

The outreach meetings are attended by Operations, Customer Service, and/or Mobility Management staff and are designed to either educate potential or existing customers on what Access Services is or respond to particular questions or concerns a particular community may have about an element of Access' paratransit service. Access Services does not charge a fee for making presentations at these community centers, but rather staff members make presentations and hand out applications and other information related to the Paratransit service that Access Services provides.

The Table in **Appendix D** lists the over 50 Outreach events that Access staff have participated in from **July 2022 through December 2025 (2022 to 2025)**. **Appendix E** provides a map showing an overview of all of the public outreach meetings conducted during the same period, covering much of the urbanized area of Los Angeles County which Access serves.

With the start of the COVID-19 pandemic in March 2020, many social service agencies suspended having in-person events or workshops. As different agencies became comfortable with virtual formats for outreach events, they

began Access representatives were invited to - and participated in - virtual events.

V. Methods of Notifying Customers of Upcoming Meetings

Access Services utilizes a variety of methods to reach out to the community to both inform the community as to the work that Access Services is doing and also to inform Access Services' own customers about changes that may come to the service that they rely upon.

Website and Mobile Application Notifications

In the digital age, Access Services' website (accessla.org) is an invaluable tool and source of information for its customers. Dates, times and locations of upcoming meetings are all posted on the front page of the website, including any important notifications such as a fare change. In addition, there is a plethora of information to be found on the website, including the Rider's Guide, application for the service, agendas, calendar, stand sign information directory, rider alerts, travel training information and other transit resources. Customers can also use the website to register to receive e-mail notifications. Access Services' website can be viewed and/or translated in over one hundred (100) different languages using Google translate.

In addition to Access' website, notifications of upcoming Community Meetings are also announced on banners on Access' Where's My Ride mobile application.

Recorded Voice Messages

Access creates recordings of pertinent information about upcoming Community Meetings, such as dates, times, and locations of the meetings. These recordings are played back while a customer may be on hold with a Customer Service or trip reservation line. The recording is also available to be heard on Access' Info-Line (213-270-6110) along with other important pre-recorded Access messages, which are changed monthly.

Seat Drops and Constant Contact Emails

Making flyers available in Access Services vehicles is customary as a method for announcing upcoming meetings to the customers who regularly utilize Access Services. Access Services prints mass quantities of flyers and shares copies with each of the service providers for placement in vehicles by drivers.

Access also sends out email blasts to customers who have shared their email addresses with Access' Constant Contact account, so that they may be notified of upcoming Community Meetings.

Advertisement with Partner Organizations

Access Services, due to its nature of providing specialized transportation to individuals with disabilities, has a variety of partner organizations in the human services and transportation services divisions of Los Angeles County. When Access Services wishes to share information throughout the County, it can advertise with managers of these human service and transportation service partners. Access Services' information can thus be presented as posted flyers at centers or by center staff sharing such information directly with their customer base.

VI. Customer Satisfaction Survey

Access Services will be conducting its next customer satisfaction survey in early (January/February) 2026 with Access' contractor Great Blue Research, Inc.

Access Services conducted its most recent general customer satisfaction survey in early 2024. The purpose of the survey was to gauge customers' perceptions of the entire transportation process provided by Access Paratransit service. Access Services contracted with Great Blue Research to conduct the survey and to organize a finalized report detailing the findings. To facilitate reliable comparisons between the six service regions, Great Blue Research attempted to complete a total of 1,200 responses across all six service regions. In order to give riders multiple opportunities to take the survey, riders receive the survey via email, text messages, telephone calls or they can access the survey on their own accord from our website. Because the distribution of customers is uneven with disproportionately larger or smaller numbers

of customers in the six service regions, quota sampling was employed to ensure that the sampling would obtain at least 1,200 responses in each of the six regions.

To ensure that the respondents were all active riders, only customers who had received transportation from Access at least once in the previous six months were included in the survey. Access Services intends to continue conducting customer satisfaction surveys going into the future with the goal of better understanding customers' perceptions of the Paratransit service that Access provides and providing customers with yet another opportunity for voicing their opinions and concerns.

VII. Media

Access Services' principal form of marketing is done through customer outreach conducted by the Operations and Mobility Management Departments along with our various partnerships with community based organizations. As shown throughout this Public Participation Plan, these outreach meetings take place in communities throughout Los Angeles County and frequently in minority communities.

At this time, Access Services does not conduct marketing through large media outlets such as newspapers, radio or television, but instead relies on its partnership with resource centers for individuals with disabilities and community health fairs and expos where Access staff attend and more fully educate potential applicants and customers about the paratransit services that Access provides to members of the disability community.

At this time, Access Services' outreach efforts have permitted the agency to explain its' service and eligibility process on a more personal level to communities who would most likely utilize the service.

IX. Evaluation

The Access Services Public Participation Plan will be evaluated and updated by Access staff on a triennial basis. However, if there are major changes to the service or in any of our public participation policies, members of the Planning Department at Access Services will update the PPP accordingly. Furthermore, the Planning Department will continue to track all meetings and community outreach conducted by Access Services every six months going forward. A Microsoft Excel spreadsheet

will be used, which will contain the type of meeting, region, location, date and city. **Appendix D** contains a copy of the template spreadsheet used to track all community outreach

X. Future Partnerships

Access Services should continue to maintain and strengthen its partnerships with the variety of transportation and human service agencies throughout Los Angeles County and even in the counties that neighbor Los Angeles County.

By partnering with fixed route operators throughout the County, Access Services will be able to attend additional community meetings hosted by these different service providers throughout the County and work to ensure that as many residents of Los Angeles County who wish to find out about Access Services are able to do so. Additionally, Access Services will ask customers themselves what community based organizations (CBO's) that they want Access Services to partner with in an attempt to reach more minority and LEP populations throughout Los Angeles County.

XII. Conclusion

In large measure, because of the very "human scale" of Access Services' paratransit model, Access Services already has a large variety of means of communicating with both its own customer base of individuals as well as share information about Access Services at public meetings throughout the County.

Access Services' Public Participation Plan is meant to be a living document promoting broad, active participation by our customers, including the targeting of low income, minority and LEP populations. Our policies were created with the goal of engaging our customers, the public and all other stakeholders and providing them with opportunities to voice their concerns and offer their input in matters of policymaking and project planning. To summarize, Access Services utilizes the following strategies to achieve the aforementioned goals:

- Information regarding all meetings is posted on Access Services' website, accessla.org, which can be viewed in over one hundred (100) languages
- Public involvement opportunities include the Community Meetings, Community Center/Information Meetings, the Board of Directors Meetings, CAC and TPAC meetings. All are open to the public and provide invaluable

opportunities for customers to play an active role in the Access Services decision-making process.

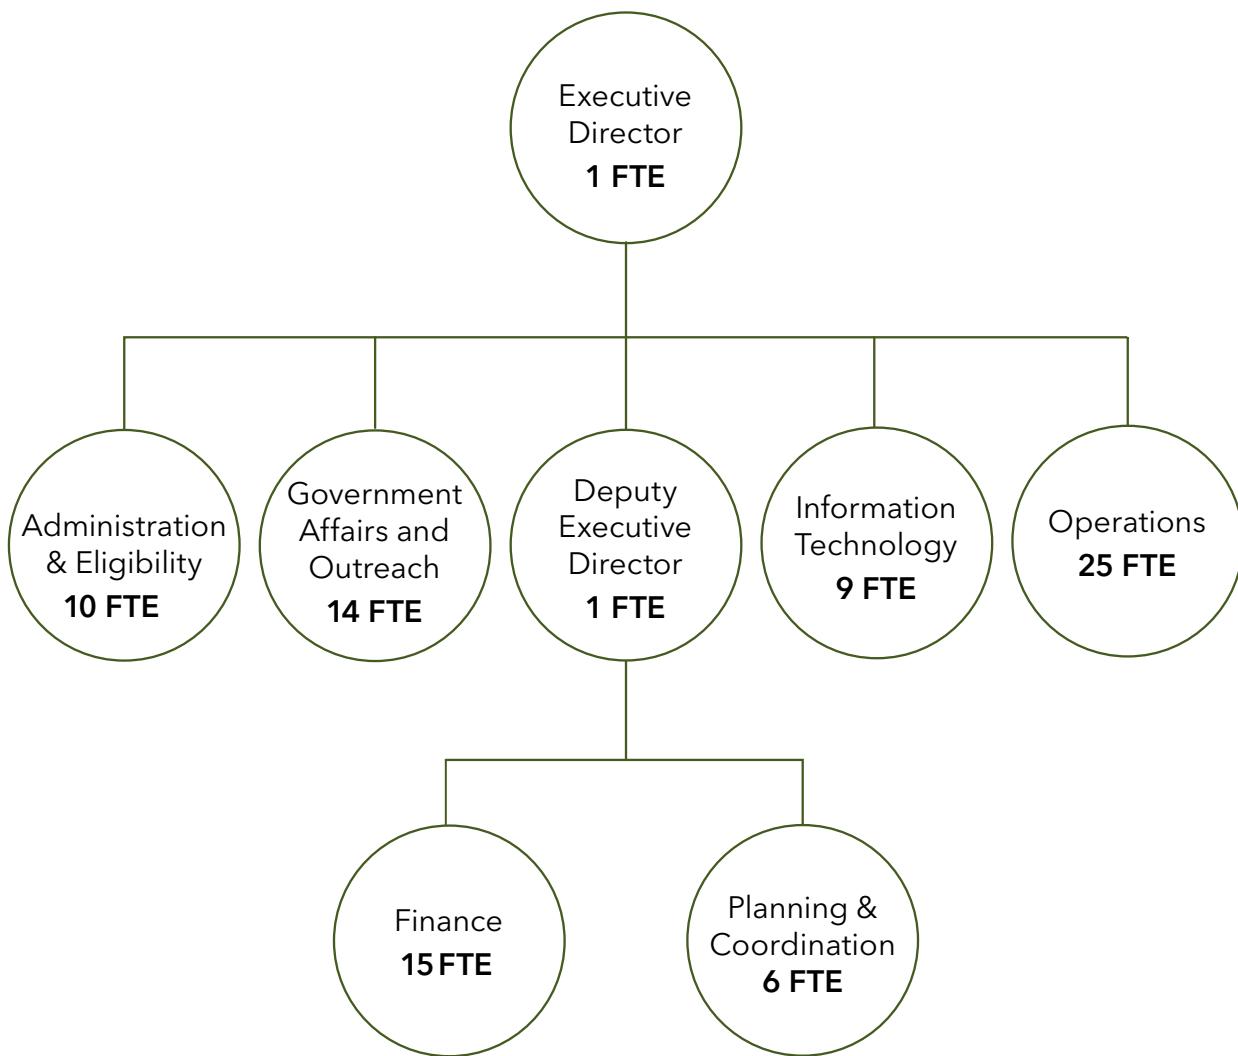

- In order to assist those with low income earning and limited transportation options, Community Meetings, are accessible to all via virtual platforms, like Zoom.
- All meetings and outreach are conducted at accessible locations and planned with the intent of accommodating minority and LEP populations (See **Appendix E** for a map of all meeting locations)
- A customer satisfaction survey was conducted, providing an opportunity for customers to voice their concerns and to let Access Services know what changes they wanted for the service, with the next survey intended for early 2026.

Access Services is open to additional suggestions as to how it can better provide service to the citizens of Los Angeles County and ensure that all communities in Los Angeles County have the opportunity to provide input on projects and policymaking.
